

## EinScan HD Prime Pack for EinScan-Pro

Greatly enhances the experience of Handheld

The EinScan-Pro+ HD Prime Pack accelerates the scan speed while in Handheld HD Scan Mode, capturing rich details of scanned objects. It is ideal for cultural heritage preservation, archiving, restoration and reverse engineering applications.

- It enables feature alignment without marker alignment in Handheld HD Scan Mode
- The scanning speed is increased by 30%, capturing high-accuracy and high-resolution scanned data more rapidly.
- It captures more details than handheld rapid scan mode without the HD Prime Pack.

Feature alignment without markers and marker alignment in Handheld HD Scan Mode

Allows markers-free scanning under Handheld HD Scan mode when the object surface has enough geometries, greatly enhancing the scanning efficiency.

The scanning speed is increased by 30% under Handheld HD Scan mode, rapidly capturing high-accuracy and high-resolution 3D data.

Captures more details than Handheld Rapid Scan mode by HD Prime without markers.

When the object surface has few geometric features, you can still scan under Handheld HD Scan mode with markers alignment.

## Specifications:

Frame Rate	10 fps
Use Distance	400-600mm
Supported OS	Windows 7, 8.1, 10, 64bit
Operating Environment	Indoor
Sensor Size	110mm*34mm*51mm (L×W×H)
